Olusegun A. Adesina, Pipeline Engineer

City of London, United Kingdom, +44 (0) 7506917661, oadesina2@gmail.com

	A well-motivated and enthusiastic Engineer of UK / Nigerian nationality, seeking to be part of a dynamic Engineering Company where I would be able to contribute my quota in achieving remarkable goals in your reputable organisation			
EMPLOYMENT HISTOR				
Sep 2018	Pipeline modelling and leak noise simulation research Engineer,- University of Southampton Southampton, Unite Kingdor			
	I carry out research on fluid pipeline leaks where I investigate mechanisms responsible for leak noise generation with the aim of providing useful information that can improve the efficiency of leak detection. I also model fluid pipes and perform steady-state and transient numerical simulations to obtain useful data to solve real work challenges. I use numerical simulation data to characterise leaks and to understand its relationship and variation with leak size, pipe size, pipe material, mean leak velocity, and leak flow rate.			
Dec 2012 — Aug 2018	Senior Petroleum Engineer, Balms Energy Limited		London, United Kingdon	
	I was part of a team responsible for modelling oil and gas reservoirs so as to optimise production and enhance recovery using state-of -the-art software.			
	I lead a team that rendered consultancy services on oil and gas asset explorations and developments, including marginal fields assessments.			
	I also had the opportunity to train and	d develop upcomi	ng Engineers.	
Dec 2005 — Dec 2010	Field Geologist, CrystalGate Geophysical Services Lagos, Nigeria			
	Worked as part of a team responsible for carrying out geophysical survey for water resources development in Nigeria where I monitored and supervised water borehole drilling operations at various sites in the region. I provided recommendations on facility designs and installations for optimum water development, production and rehabilitation.			
	provided recommendations on facility			r development, production
EDUCATION	provided recommendations on facility			r development, production
EDUCATION Sep 2018 — Sep 2023	provided recommendations on facility	y designs and insta	allations for optimum wate	
	provided recommendations on facility and rehabilitation. PhD Candidate - Pipeline mod	y designs and insta delling and sin racterisation.	nulations for optimum wate	e University o Southampton, Unite
Sep 2018 — Sep 2023	provided recommendations on facility and rehabilitation. PhD Candidate - Pipeline mod generation, detection and char	delling and sin racterisation.	nulations for optimum wate	e University of Southampton, Unite Kingdon City of London, Unite
Sep 2018 — Sep 2023 Sep 2011 — Sep 2012	provided recommendations on facility and rehabilitation. PhD Candidate - Pipeline mod generation, detection and characterists. M.Sc.
